ENERGY SOLUTIONS

SAVE MONEY AND SEE A HEALTHY RETURN ON YOUR INVESTMENT WHEN YOU SWITCH TO RENEWABLE ENERGY

1. WE MAKE SURE YOUR SWITCH TO RENEWABLE ENERGY PAYS

We understand you won't switch to renewable energy for the environmental benefits alone. You need to see a financial benefit too.

We combine our expert technical knowledge with a thorough understanding of how you can consistently gain the best possible income.

So we'll help you cut your energy costs and make the most of government incentives. And you'll enjoy an annual return on investment of 12% to 20%.

2. WE MAKE SURE YOUR SWITCH TO RENEWABLE ENERGY IS EASY

From start to finish we ensure that the process of switching to renewable energy is fast and hassle free. Our dedicated team aim to get you up and running and generating an income within weeks. We do all this for all our products. And will make sure you get the system, or mix of systems, that will work best for you.

SURVEY DESIGN INSTALL SERVICE

3. WE MAKE SURE YOUR SWITCH TO RENEWABLE ENERGY IS RELIABLE

Our aim is to show how, when expertly designed, installed and maintained, renewable energy can have considerable financial benefits alongside its environmental ones.

This is why we maintain our focus on engineering and technical excellence.

It's why we'll never install our systems unless we're sure you'll see a healthy return.

And it's why we place so much emphasis on the quality of our aftersales service.

OUR AFTERSALES SERVICE

Biomass boilers work hard, operating almost continuously. Because a healthy return depends on a healthy boiler, we advise you have yours serviced at least once a year.

We service and repair:

- Any make of biomass boiler
- Biomass boilers another company installed
- CHP units
- Fuel stores

HIGHER QUALITY FUEL = HIGHER RETURNS

To get the best return from your biomass boiler or CHP unit you must use a good quality fuel. Poor quality fuels can block the fuel inlet and may not burn as well.

We supply high quality wood chip for your CHP unit or biomass boiler. We can deliver to you every week, which means you can be sure of a regular supply and need less storage space on site.

And when you buy your wood chip from us under an annual contract, you get it at a great price.

FREE SITE SURVEY

To be reliable and cost-effective, your switch to renewable energy must meet a number of legal, technical and site considerations.

We can survey your site to make sure switching will work well for you. There's no obligation and it's completely free.

THE BENEFITS OF A LOCAL TEAM

We prefer to supply customers who are not too far from our base in Monmouthshire. This is so we can always get to you quickly and meet our call-out promise.

It also means we're well-known locally. And is one of the reasons our business has consistently grown through word of mouth.

Our customers are impressed by the work we do and are happy to recommend us to others.
